

QUARTZ COLLECTION

NATURE 
TRANSFORMING SPACES

TERRAIN

The Terrian Series by NatureQ features bold veining that flows across a soft, neutral quartz base—bringing nature’s drama indoors. This design makes a striking statement while maintaining a sense of harmony. Built for durability and elegance, it's ideal for upscale kitchens, islands, and wall cladding. Choose Terrian to infuse organic artistry into modern spaces.

TERRIAN SERIES

WHY CHOOSE QUARTZ

Stylish Appearance

Most patterns of engineered stones resemble natural stone but with a consistent pattern, texture and color. Thus flooring or countertops have a uniform appearance.

Hygiene and Eco-Friendly

In addition to kitchen countertops, engineered stone products are suitable for locations such as commercial buildings, canteens, hospitals, food service areas, etc.

Durable Material

Resistance to acid and food safe, Suitable for kitchens and wet areas and less porous more durable scratch resistant and heat resistant.

Easy Clean & Maintain

The hard, non-porous surface retains its polished luster and does not need sealing treatment on the surface.

Cost Efficient

Quartz is more durable & easier to repair

Multiple Design Options

Most exceptional design options to choose from.

Strength

Most Quartz is hardest material after diamond. The high MOH score and better scratch resistance properties make the material suitable for commercial flooring applications where traffic and abrasion factors are high.

FACTORY OVERVIEW

KSG is India's leading producer and exporter of natural stones powered with most advanced stone processing facilities.

KSG focuses on design, development, manufacturing and marketing of premium engineered quartz stone products.

To cater to high demand of engineering quartz slabs to offer premium and consistent quality "KSG started engineered stone" plant under the brand of "NatureQ".

We bring high standards to transform quartz into fashionable design range and exceptional customer experiences. We have installed "state of art" fully automated line equipped with Breton Italy (calibration and finishing line) and moulding line by veegoo.

The plant has a capacity of producing 200 slabs/day of jumbo size (3225 x 1625 mm)

KSG - Aspires to enhance its core values of integrity, honesty, leadership and commitment to quality

NATURE'S STORIES, TOLD IN STONE

From granular quartz to polished slab, every NatureQ Surface carries a fragment of the planet that formed it. A fully integrated Veegoo line manages batching, vacuum vibro compression, pressing, heating, and controlled curing -locking nature's patterns into dimensionally stable jumbo slabs. Post curing, Breton calibrating and multi head polishing units refine each slab to a mirror flat geometry with a factory gloss exceeding 60 GU. The result is a dependable, large scale canvas that lets designers realise ambitious concepts while honouring the richness of the natural world.

SUSTAINABILITY AT NATUREQ

The Eco-Friendly Choice

Quartz is one of the most abundant minerals on Earth, found naturally in sand, soil, and rock formations. By using this readily available resource, we minimize the need for extensive mining, reducing the environmental impact associated with sourcing raw materials. Our production process also uses advanced technology to ensure that every slab is made efficiently and with minimal waste.

Reduced Environmental Footprint

We are proud to say that our quartz surfaces are made with sustainability in mind. During the production process, we recycle water, minimize energy consumption, and ensure that leftover materials are repurposed whenever possible. This allows us to significantly reduce our environmental footprint while still delivering high-quality, durable products.

Long-Lasting Durability

Choosing NatureQ is a sustainable decision in itself. Our surfaces are designed to last for decades without losing their beauty or functionality. With their resistance to scratches, stains, and heat, you won't need to replace them frequently, cutting down on the waste and resources associated with renovations.

Non-Toxic and Safe

Our quartz surfaces are non-porous and don't require harmful chemical sealants, making them a healthier choice for your home or workspace. By preventing bacteria and mold growth, they contribute to a cleaner, safer environment without the need for harsh cleaning products. This not only protects your family but also reduces the number of chemicals released into the environment.

TECHNICAL FEATURES

Resists Stains

NatureQ quartz surfaces are non-porous, preventing spills from seeping in. This makes them highly resistant to common household stains. A simple wipe keeps the surface spotless and fresh.

Resists Scratches

Built with durable materials, NatureQ quartz resists everyday wear and tear. It maintains its polished finish even with heavy use. Ideal for busy kitchens, worktops, and commercial spaces.

Resists Heat

NatureQ quartz is engineered to handle moderate heat exposure. It resists damage from hot pots, pans, and appliances. Perfect for kitchen counters where heat resistance matters.

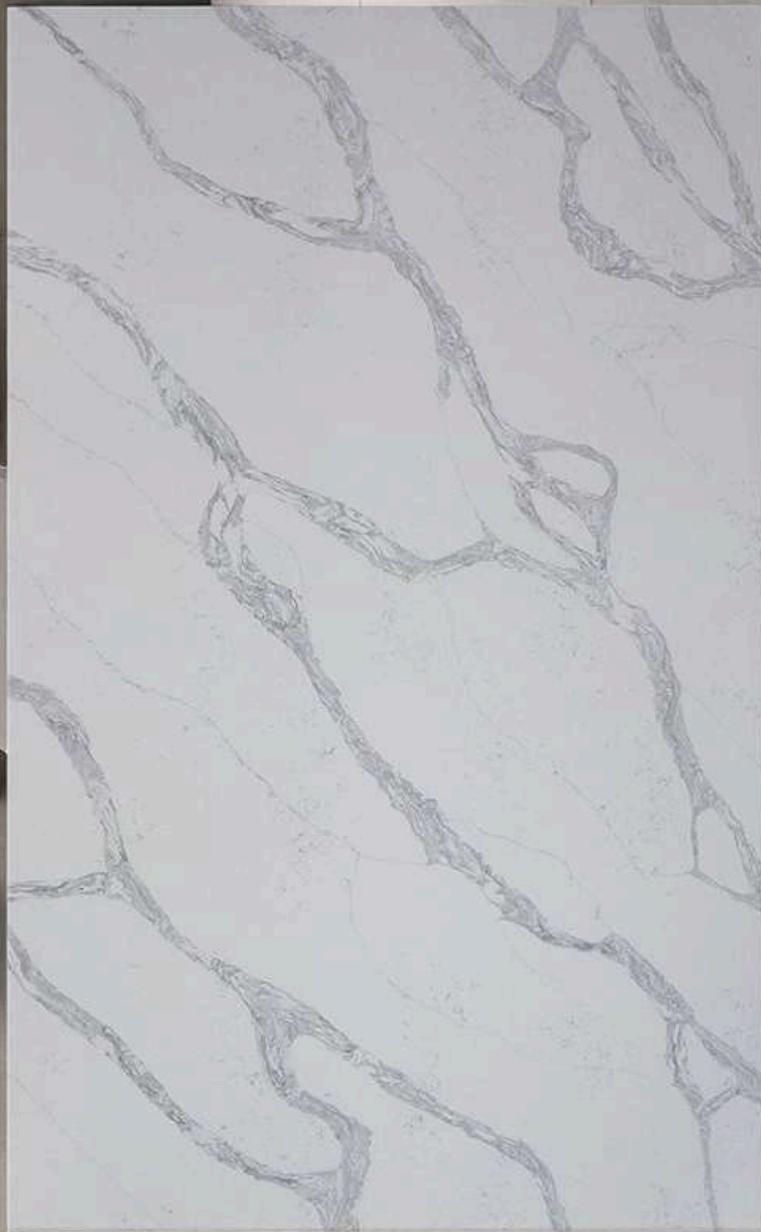

15 YEARS WARRANTY

At NatureQ, we stand behind the quality and durability of our premium quartz surfaces. Every product comes with a 15 year limited warranty, ensuring long-term peace of mind. Our surfaces are engineered to resist stains, scratches, and heat for lasting performance. The warranty covers manufacturing defects under normal residential use. With proper care and maintenance, your NatureQ surface will retain its beauty for years. We are committed to delivering excellence backed by reliable customer support.

Trust NatureQ – where quality meets confidence.
