TRANSFORMING SPACES

QUARTZ COLLECTION

[natureq.in](http://natureq.in)

The relationship between nature and man is eternal. Water, air, all the elements of the sky, fire and earth are actually the holders and sustainers of the living beings.

Quartz is the most common material found in the surface of earth made from silicon and oxygen the mineral it self tends to found in the sand at beach, in the desert and at the bottoms of rivers, it's a really durable mineral and isn't likely to be destroyed in extreme weather conditions, making it really abundant.

## Why Choose Quartz

### Stylish Appearance

Most patterns of engineered stones resemble natural stone but with a consistent pattern, texture and color. Thus flooring or countertops have a uniform appearance.

### Multiple Design Options

Most exceptional design options to choose from.

### Durable Material

Resistance to acid and food safe, Suitable for kitchens and wet areas and less porous more durable scratch resistant and heat resistant.

### Easy Clean & Maintain

The hard, non-porous surface retains its polished luster and does not need sealing treatment on the surface.

### Cost Efficient

Quartz is more durable & easier to repair.

### Strength

Most Quartz is hardest material after diamond. The high MOH score and better scratch resistance properties make the material suitable for commercial flooring applications where traffic and abrasion factors are high.

### Hygiene and Eco-Friendly

In addition to kitchen countertops, engineered stone products are suitable for locations such as commercial buildings, canteens, hospitals, food service areas, etc.

# Factory Overview

**KSG** is India's leading producer and exporter of natural stones powered with most advanced stone processing facilities.

KSG focuses on design, development, manufacturing and marketing of premium engineered quartz stone products.

To cater to high demand of engineering quartz slabs to offer premium and consistent quality "KSG started engineered stone" plant under the brand of "**NatureQ**".

We bring high standards to transform quartz into fashionable design range and exceptional customer experiences. We have installed "state of art" fully automated line equipped with Breton Italy (calibration and finishing line) and moulding line by veegoo.

The plant has a capacity of producing **200** slabs/day of jumbo size **(3225 x 1625 mm)**

KSG - Aspires to enhance its core values of integrity, honesty, leadership and commitment to quality.

# Nature's stories, told in stone

From granular quartz to polished slab, every NatureQ Surfaces carries a fragment of the planet that formed it. A fully integrated Veegoo line manages batching, vacuum vibro compression, pressing, heating, and controlled curing -locking nature's patterns into dimensionally stable jumbo slabs. Post curing, Breton calibrating and multi head polishing units refine each slab to a mirror flat geometry with a factory gloss exceeding 60 GU. The result is a dependable, large scale canvas that lets designers realise ambitious concepts while honouring the richness of the natural world.

# Versatility of Application

## Countertop

Quartz countertops combine stunning aesthetics with strength. They are heat, scratch, and stain resistant—ideal for daily kitchen use. Available in various colors and patterns to suit all styles.

## Vanity Top

Quartz vanity tops bring a luxurious yet practical finish to bathrooms. They're easy to clean and resist water, soap, and cosmetic spills. A perfect blend of beauty and hygiene for modern bathrooms.

## Wall Cladding

Quartz wall cladding adds elegance and depth to any interior or exterior. Its non-porous surface resists moisture and stains. Ideal for accent walls, backsplashes, and lift lobbies.

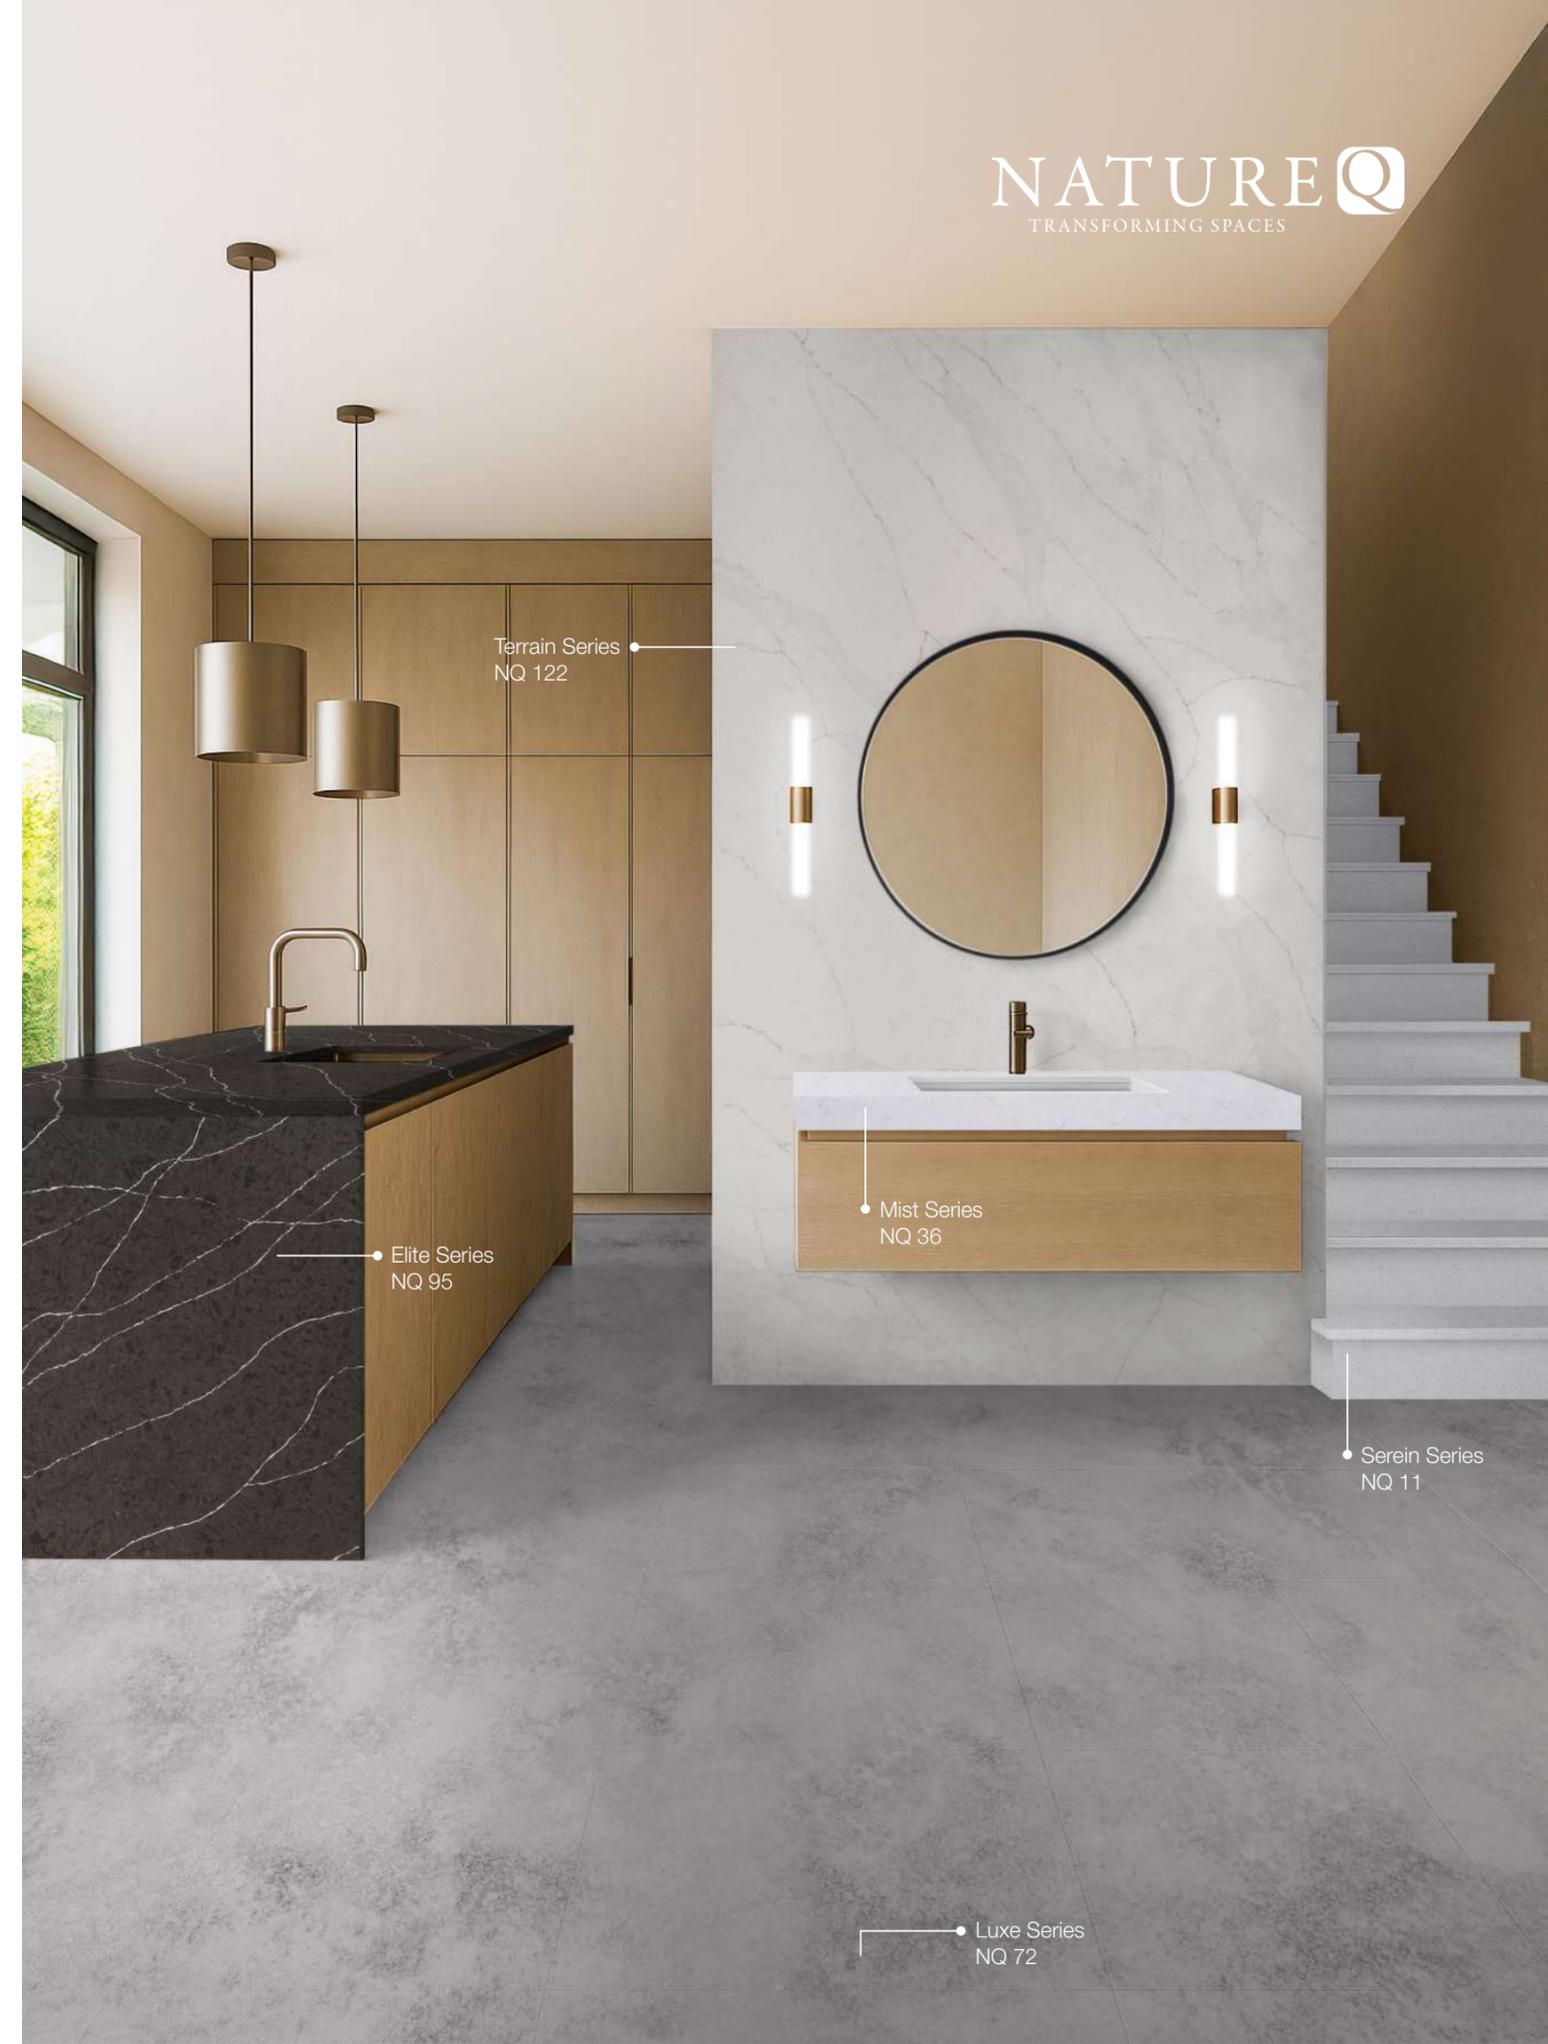

## Flooring

Quartz flooring offers high durability with a sleek, seamless finish. It withstands heavy foot traffic and is easy to maintain. Perfect for both residential and commercial spaces.

## Stairs

Quartz staircases offer a refined, polished look with added durability. They're slip-resistant and low-maintenance, ideal for high-use areas. Enhance your interiors with stylish and safe quartz steps.

# 15years Warranty

# Technical Features

At NatureQ, we stand behind the quality and durability of our premium quartz surfaces. Every product comes with a 15 year limited warranty, ensuring long-term peace of mind. Our surfaces are engineered to resist stains, scratches, and heat for lasting performance. The warranty covers manufacturing defects under normal residential use. With proper care and maintenance, your NatureQ surface will retain its beauty for years. We are committed to delivering excellence backed by reliable customer support.

Trust NatureQ — where quality meets confidence.

## Resists Stains

NatureQ quartz surfaces are non-porous, preventing spills from seeping in. This makes them highly resistant to common household stains. A simple wipe keeps the surface spotless and fresh.

## Resists Scratches

Built with durable materials, NatureQ quartz resists everyday wear and tear. It maintains its polished finish even with heavy use. Ideal for busy kitchens, worktops, and commercial spaces.

## Resists Heat

NatureQ quartz is engineered to handle moderate heat exposure. It resists damage from hot pots, pans, and appliances. Perfect for kitchen counters where heat resistance matters.
